

## INVESTMENT OPPORTUNITIES IN AGRO-LOGISTICS IN ANGOLA

**23 April 2024 | 14:45-14:45**  
**Royal Tropical Institute - KIT, Amsterdam**

The Lobito Corridor consists of a 1,300 km railway line traversing Angola from the Atlantic Ocean to the country's borders with DRC and Zambia. The Corridor has seen a resurgence in interest in recent months, as evidenced by the signing of MOUs and agreements, most of which concern the development of the Corridor and activities related to green and clean energy technologies. The parties involved are diverse, including the EU, the US, Angola, the DRC, Zambia, AfDB, AFC, as well as a consortium comprising Trafigura, Mota-Engil, and Vecturis and for the Caála Logistics Platform, the involvement of Netherlands with the consortium Flying Swans. Join the Angola country session to explore lucrative investment opportunities in value chains (e.g. agricultural production, renewable energy, logistics) along the Lobito Corridor and foster mutually beneficial collaborations with key stakeholders in Angola.
